## Mosquito/Tick prevention for our yard (Camp) and yours

There has been a lot in the news recently about the threat of mosquito and tick borne diseases and how they affect us in the Rochester and surrounding areas. Most of us have heard of West Nile ([Encephalitis](#)) and [Lyme](#) disease. There is a lot that can be done to mitigate those risks and Creative Themes Day Camp is implementing a proactive approach to keeping your children, our staff, and visitors to Creative Themes Day Camp safer by partnering with Mosquito Squad of Rochester (MSR).

MSR is America's premier outdoor pest control company. They specialize in the safe control of ticks and mosquitoes as well as other biting pests that can threaten the well-being those most important to us.

For the significant reduction of ticks and mosquitoes at the Creative Themes Day Camp, the Directors will be implementing a tick and mosquito prevention plan for the year 2016. The plan will consist of preseason Traditional Product treatment of the property and its perimeters switching to Organic product applications in-season when the camp opens and is occupied. In addition we are implementing the use of Mosquito Squad's Tick Tube Application to address the threat of [nymph ticks carried by mice](#). All the products that will be used are safe once dry. All applications will be done when the camp is empty and there is adequate time for the products to dry. The MSR products and their labels can be found at the link below.

There are additional links to informational articles from URMC, Mosquito Squad of Rochester, and others. Additional informational brochures are available as well as copies of a tick study done on Fire Island, NY.

Mosquito Squad of Rochester is available at any time to answer questions you may have about the service or products used. 585-241-0111 or email Joe Koval, Managing Owner at [Rochester@mosquitosquad.com](mailto:Rochester@mosquitosquad.com)
