* All health forms should be updated by now. If you have not updated yours for 2016 please do so asap. It is important we have all this information as up to date as possible.

Our Natural Surroundings

Creative Themes is for the third year using an All Natural spray to reduce the problems associated with mosquitos and ticks. We recommend that you looking into controlling the ticks and mosquitos in your own back yards, for the safety of you and your children's health. We are very happy with the service provided by [Mosquito Squad of Rochester](#). Owner Joe Koval has provided use with great information and a referral program. You can find that information on our website news [page](#).

What Campers Should Have On Their Feet

Keep in mind that Creative Themes Camp facility is an outdoor environment. Be smart in how you dress, the shoes you wear, and the things you bring to camp. **We would like to remind campers that proper shoes for our environment are shoes or sandals that have good soles and attach to the foot.**

Closed-toe shoes and sandals are preferred. FLIP FLOPS are not appropriate footwear choices, as they leave feet exposed to the elements, give no support during play, and are an accident waiting to happen. Please, do not send the children to camp with FLIP FLOPs as their main footwear. Flip flops may be used around the pool area. Crocs have also become very dangerous at camp. We would prefer them not to be worn for camp activities.
